

3 New Projects Spur Snow Basin Sports

Much has been done to improve the area starts just above the main electric tow and serves the big schuss and a new run named the "Midway." It's a steep and bumpy run which will be thrilling to the experienced skier.

The new intermediate tow is regarded as certain to be very popular. It is a tow path with just the right grade and the old bumps are gone. The hollows have been filled in. It serves the lower 800 feet of the hill and when necessary can be cut off from the main slope. The tow will run at a slower speed than the main 1600 foot tow so that those who are not able to use the high speed rope will have a chance to ski interesting terrain.

WHAT'S SNEW AT GROSSINGER'S?

What's new at Grossinger's? Why snow, that's what's new! We've installed a new snow-making machine that grinds out white stuff for skiers. We'd been calling the manufactured flakes "artificial snow." Actually, though, the machine-made crystals are exactly the same as the real snow which float from the sky. Well, we figured that "artificial" wasn't the word to use, so we came up with our own name. To differentiate, we dubbed the manufactured article "SNEW." So, if anyone asks you, "What's new?" tell him: "The machine-made snow at Grossinger's."
